I am a student at the Politeknik Elektronika Negeri Surabaya, majoring in Informatics Engineering. I am interested in Backend, Frontend, Mobile development. I have experience in completing an institutional application where I initially served as a backend developer and later became a Fullstack developer, overseeing the entire application. I also have experience in Flutter Mobile, Software Quality Assurance, and served as Assistant Product Owner of Simple Wallet.

Experience

Fullstack • Intern CV Sejahtera Mandiri Solusindo

May 2024 - Aug 2024 | Surabaya, Indonesia

- Responsible for handling backend software with Javascript and Python.
- Assistant Project Manager - Team Coordination and Management
- Create an API with JavaScript Express.
- Designing the data layout in the PostgreSQL database.
- Building the Frontend feature with Next JS and TypeScript.
- Deploying the application to the windows server.

Backend Developer • Intern CV Sejahtera Mandiri Solusindo

Dec 2023 - May 2024 | Surabaya, Indonesia

- Responsible for handling backend software.
- Assistant Project Manager - Team Coordination and Management
- Create an API with JavaScript Express.
- Designing the data layout in the Postgre database.
- Worked on connecting backend with Next JS Frontend.
- Deploying the application to the windows server.

Assistant Product Owner • Agile Teknik

Feb 2023 - Nov 2023 | Surabaya, Indonesia

- Coordinate the Simple Wallet team with the product to identify bottlenecks in product development.
- I was assigned to Software Quality Assurance.
- I provide assistance to Flutter based Mobile developers.
- I am involved in creating a PHP Laravel based backend system.

Steering Committee of Major Orientation

Jun 2022 - Jan 2023 | Surabaya, Indonesia

- I collaborated with the information engineering student association to create a concept for a major orientation event.
- I provided guidance to the committee for the introduction to the department.

Frontend Developer • E - code

Dec 2021 - May 2023 | Surabaya, Indonesia

- I worked on the front end of the e-voting project for the election of chairman of the Informatics Engineering Student Association.
- This project uses PHP Laravel.
